Education

- **System analytis and development**

  Vianna Júnior • 2016 - 2018

  The Internet Systems course at Faculdades Integradas Vianna Júnior offers all the qualities needed to train professionals capable of standing out in the market. Students will be equipped to create new platforms and applications for smartphones and tablets, as well as to manage and maintain networks, servers, websites, and databases, supported by a virtual library with over 5,000 digitized titles.

Licenses & Certificates

- **Building a Reminders App Clone with SwiftUI & Core Data**

- **MV Design Pattern in iOS - Build SwiftUI Apps Apple's Way**

- **MVVM Design Pattern Using Swift**

- **The Complete React Native + Hooks Course [2020 Edition]**

- **Agile Management With Scrum**

Projects

- **CleanerXcode**

  CleanerXcode is a macOS tool designed to remove unnecessary Xcode files, such as Derived Data, build caches, device support files and simulator data.

- **Formidable**

  The Formidable protocol is designed for objects that manage forms composed of multiple FormField components. By conforming to this protocol, you can leverage built-in functionality to validate, reset, and check the validity of all form fields at once.

- **Uncompress**

  Simple library to decompress files .zip, .rar, .cbz, .cbr in React Native.

Languages

- **English:** Intermediate (A2).
- **Portuguese:** Native.
